Selected and sufficiently ripe fruits with a higher content of sugar are used in the production process. One liter of brandy is produced from 16 kg of this fruit.

11

ZARIC RASPBERRY *

Twenty kilograms of carefully selected raspberry fruits is needed for the production of one litre of this exclusive brandy. Thermal processing isolates and preserves the flavour so that the produced brandy should not be coloured, and to keep the characteristic fragrance and flavour of perfect fresh fruits.

11

ZARIC PEAR
